SEE STUDENTS ACADEMIC PERFORMANCE 2007-2018

SCHOOL OF ELECTRICAL ENGINEERING

PREPARED BY: NGUYEN THI LAN HUONG

Introduction

- HUST adopted the credit-based system since 2009
- Before, most HUST students graduate in June
- Now, we see more and more students graduate in August, December
- Time to graduation seem to fluctuate
- Need to revise student overall academic performance
 - Time to graduate
 - Graduate rate
 - Dropout rate

Data

- Raw data supplied from the Academic Office
- Data structure: Student ID, Semester ID, StatusCode, CPA
- Total number of records analyzed: ~3300 (all majors in SEE, including bachelor programs)
- Number of entrance in each year: Data taken separately by SEE. SEE's account does not have access to students' CPA

Graduate time vs CPA

Dropout time vs CPA

Most difficult subjects

Some conclusion

- Most students graduate on time
- EE2 program has high ratio of good students
- Most students with long graduate time have low CPA (obvious)
- Analysis of dropout
 - Some have very high mark, perhaps these students changed program or went abroad
 - The rest: Reason for dropout mostly because of poor results in the first two years
 - CPA gradually increases with student efforts, but students cannot get out of warning level 3, and end up at the 7.5 year deadline
- Analysis of students on warning level 3: Most difficult subjects are in the first two years.
 These students need good strategy to reduce warning level.
