## MISSION, VISION & CORE VALUES

### I. MISSION

A commitment to human development, high-quality workforce training, scientific research, technological innovation and knowledge transfer that serves our country and global society.

### II. VISION

To become a leading research university rooted in the technical and technological fields; to make significant contributions that develop a knowledge-based economy and maintain national peace and security; and to be a pioneer in growing and sustaining Vietnam's higher-education system.

### III. CORE VALUES

- 1. Academic Excellence - Effectiveness:** We are committed to academic excellence and optimal effectiveness throughout every aspect of our university
- 2. Dedication - Commitment:** We value the dedication and full commitment as the greatest values of generations of HUST staff and students.
- 3. Integrity - Respect:** We value integrity in professional and social life, respect for dignity, regard for our laws and regulations, and respect for the diversity and inclusivity of our community.
- 4. Individual talent – Collective brainpower:** We value the success of the individual creativity and talent as key elements for successful breakthroughs - while also valuing the power of collective brainpower to ensure sustainable innovation and growth.
- 5. Inheritance – Creativity:** We ensure that innovative and creative thinking, based on quintessential intellect, inherit existing achievements and promote traditional values.

### HIGHLIGHTS

FOUND

STUDENT  
ENROLLMENT

- More than 2 students
- Scale of annual enrollment: 5,500- 6,000
- More than 5 Doctoral programs

CAMPUS

- Total area: 2
- Number of buildings
- Number of laboratories and training and

## OUR VISION

### Vision

- One of the leading organization of the country in training, scientific research, consultancy and technology transfer in the field of Biotechnology and Food Technology linked with international integration
- SBFT is a reliable address to accumulate talented lecturers, researchers, students and domestic and international investors to study, to do research and cooperate in developing of science and technology

### Strategy

- Innovate the training program and training method, apply new educational technology, to reach the regional and international accreditation standard
- Combination of training and scientific research activities towards international integration, meeting the requirements of the society
- Strengthening cooperation with domestic and foreign partners to promote the sustainable development in biotechnology and food technology.

**Educational philosophy:** *Promote active learning - research - creative capacity*
